

Ross Datathon Judging Guidelines

Innovative Topic Question and Impact	1-2 (Needs Improvement): The team's question lacks innovation and fails to demonstrate a clear impact. It's either too broad, generic, or doesn't align well with the provided data. There is no consideration of ethical implications in data collection. 3 (Average): The team's question is somewhat innovative, but the impact may be unclear or not well-explained. The question aligns with the dataset, but there's room for improvement in creativity and specificity. Ethical considerations in data collection are minimally addressed, if at all. 4 (Good): The team's question is innovative, specific, and shows a decent understanding of impact. It aligns well with the dataset, demonstrating the team's ability to think innovatively. Ethical implications of data collection are acknowledged. 5 (Excellent): The team's question is exceptionally innovative, original, and has a profound impact. It reflects a deep understanding of the problem, showcasing high levels of ingenuity and insight. Ethical considerations in data collection are thoughtfully integrated and applied to the dataset. .	__/5
Impact and Clarity of Results Aligned with Client/Market Needs	1-2 (Needs Improvement): The team's presentation lacks clarity, and the results aren't well-defined or justified. The impact of the proposed solution is unclear, and there's little evidence of critical thinking. The alignment with client/market needs is not evident. 3 (Average): The team presents results with some clarity, but there may be gaps in the explanation or justification. The impact of the solution is discussed, but it may lack depth. The alignment with client/market needs is present but may need further emphasis. 4 (Good): The team presents results with clarity, providing a well-justified explanation of the impact of their solution. The presentation demonstrates critical thinking. The solution is aligned with client/market needs, contributing to its relevance. 5 (Excellent): The team's presentation is exceptionally clear, concise, and persuasive. Results are thoroughly justified, and the impact of the proposed solution is profound. The solution is not only aligned with client/market needs but also anticipates and addresses potential future requirements.	__/5
Data Driven Rationale and Evidence	1-2 (Needs Improvement): The team's rationale for the chosen solution is weak, lacking depth and clear justification and not grounded in provided data. There's minimal evidence or support for the chosen approach. 3 (Average): The team provides a rationale, but it may lack depth or thorough data driven evidence. Some evidence is presented, but it may be incomplete. 4 (Good): The team's rationale is strong and well-substantiated. They provide clear reasoning for their chosen approach, supported by relevant evidence using the provided data. 5 (Excellent): The team's rationale is exceptional, demonstrating a deep understanding of the problem and the dataset provided. The solution is thoroughly justified with compelling evidence and airtight reasoning that fully leverages the dataset and potentially additional publicly available data.	__/5
Data Analysis and Methodology	1-2 (Needs Improvement): The team's data analysis is minimal, lacking depth or relevance. There may be a failure to uncover meaningful patterns or insights. The qualitative analysis and decision-making methodology are weak, lacking structure or coherence. 3 (Average): The team conducts a basic data analysis, identifying some patterns or trends. However, the analysis may be limited in scope, and important insights may be overlooked. The qualitative analysis and decision-making methodology are present but may lack depth or thorough substantiation. 4 (Good): The team's data analysis is comprehensive, uncovering meaningful patterns and insights. The analysis is well-executed and contributes significantly to the overall solution. The qualitative analysis and decision-making methodology are well-structured and coherent, contributing to a robust solution. 5 (Excellent): The team's data analysis is exceptional, revealing profound insights and demonstrating a sophisticated understanding of the dataset. The qualitative analysis and decision-making methodology are exceptional, showing a deep understanding of qualitative data and its impact on decision-making. The combined methodology significantly enhances the overall quality and strength of the proposed solution.	__/5
Storytelling with Data	1-2 (Needs Improvement): The team's data storytelling is minimal, lacking a clear narrative or effective communication of insights. The presentation may be disjointed, making it challenging for the audience to follow the team's story. 3 (Average): The team attempts data storytelling, but there's room for improvement in creating a cohesive narrative. The presentation may have some storytelling elements, but they may not effectively convey the significance of the data. 4 (Good): The team incorporates data storytelling elements well, creating a cohesive narrative that enhances the understanding of insights. The presentation engages the audience and effectively communicates the importance of the data in the context of the proposed solution. 5 (Excellent): The team excels in data storytelling, crafting a compelling narrative that seamlessly weaves together insights and proposed solutions. The presentation is highly engaging, ensuring that judges easily grasp the significance of the data and the team's innovative approach.	__/5
